

## 36" Induction Cooktop with Concealed Central Touch Slider Interface

### Professional Series

#### **PE365HB**

This 36" induction cooktop features 5 induction zones. It offers 9 power levels, each equipped with a booster for even faster cooking performance.

The new touch control slider with white LED provides clear, intuitive step-by-step guidance during cooking. The control interface, invisible when off and brightly illuminated when active, perfectly embodies Bertazzoni's philosophy of discreet elegance and intuitive functionality. The Multi-zone function allows you to combine multiple cooking zones into one larger area, making it ideal for oversized pots or griddles.

With a maximum output of 3.0 kW in Boost mode, the cooktop brings water to a boil faster and reaches higher temperatures—perfect for searing meat. The highly flexible induction elements also allow for precise low-heat cooking, maintaining stable temperatures and offering ultra-quiet operation for maximum comfort.
